Dear Source Water & UIC Section Ryan Hancharick,

I am begging you to DENY the proposed Plum Injection Well, Sedat #4A! Injection Wells like this put drinking water at risk and coincide with a plethora of other impacts. When this injection well fails and contaminates Allegheny County's drinking water, as it inevitably will, residents will be exposed to chemicals that will cause long-term health issues, including cancers, heart and lung disease, liver and kidney toxicity, etc. Allowing this Injection Well to operate will violate my right as a Pennsylvania citizen to pure water as stated in Article I, Section 27 of the Pennsylvania Constitution.

History with Penneco demonstrates their lack of accountability or concern for the health and safety of residents. Failure occurred at the first injection well at this site, and it has not been corrected. Penneco knows they can stall and fail to pay penalties because the PA DEP is under resourced and will not enforce penalties or corrective actions.

PLEASE send the message to Penneco that they must DEMONSTRATE responsible behaviors before any expansion of their operations is contemplated and approved!!!

Sincerely,
